

# Support time of SMA products with regard to security updates

## 1 Support time by product

According to Directive 2014/53/EU of the European Parliament (also known as the "Radio Equipment Directive"), manufacturers are required to specify a period for which security updates will be provided. For this reason, the information provided below should be regarded as minimum standards and does not conflict with our warranty commitment, which ensures the functionality of our products—including software updates—throughout the entire warranty period.

The following overview provides information on the minimum period in which SMA Solar Technology AG provides security updates for the products Sunny Tripower, Sunny Tripower Storage, Sunny Boy, Sunny Island as well as communication products and charging stations.
