Independent of the duration of the SMA Limited Factory Warranty, for all product types listed above, the **factory warranty period begins when the device is first commissioned (in line with the commissioning report) or with the invoice date of the first warranty claimant**. Requirement for this, however, is **a product registration on the SMA website** ([www.my.Sma-Service.com/s/product-registration](http://www.my.Sma-Service.com/s/product-registration)) **within 12 months after initial commissioning or the invoice date for the first warranty claimant**. SMA will inform warranty claimant in advance about this costs. The repair will be performed depending on the warranty claimant's consent to cover these costs.

## Warranty Coverage

The scope of the warranty coverage from the SMA Limited Factory Warranty is defined by the various warranty levels offered by SMA (standard SMA Limited Factory Warranty, Active- or Comfort-level).

In any case, the warranty claimant must accept a replacement device even if it has cosmetic defects that do not affect energy production or safety compliance. SMA will, at its sole discretion, use new and/or equivalent to new devices or parts in the original or the improved design. SMA will retain ownership until it receives the defective device.

SMA also reserves the right to reimburse an appropriate market value specified by SMA of the defective device (which is determined by SMA based on the market value that the device would have if it were not defective) for products with SMA Limited Factory Warranties greater than 5 years, and to therefore satisfy the warranty obligations.

## Standard SMA Limited Factory Warranty

### Geographic Scope of Application

The obligations under the standard SMA Limited Factory Warranty are rendered worldwide.

## Specification of Obligations

The standard SMA Limited Factory Warranty includes the provision of a replacement device or spare part of equivalent value in terms of product type, kVA power class or age at the relevant spare parts warehouse of SMA from the start of the warranty period for the duration of the warranty period regulated above. Transport and customs clearance do not fall within SMA's area of responsibility. Any costs and expenses incurred for this are to be borne by the warranty claimant.

### Active-Level

#### Geographic Scope of Application

The scope of obligations of the Active-level of the SMA Limited Factory Warranty is provided in the following **SMA Active Support countries**, however excluding their associated islands and overseas territories:

Argentina	Bangladesh	Belize	Brazil	Chile
Costa Rica	Columbia	El Salvador	Guatemala	Honduras
India	Israel	Indonesia	Jordan	Japan
Malaysia	Mexico	Myanmar	Namibia	Nicaragua
Philippines	Panama	Sri Lanka	San Marino	Singapore
South Africa	Turkey	Taiwan	Thailand	Ukraine
United Arab Emirates	Vatican City	Vietnam		

## Specification of Obligations

Within the Active-level, the SMA Limited Factory Warranty covers the costs incurred for a replacement device of equivalent value in regard of product type, kVA power class or age as well as its shipping and the return of the defective device during the defined warranty period as part of and in accordance with the conditions stipulated herein from the date the warranty period begins.

Alternatively, SMA reserves the right to repair the defective device at SMA's premises or, in exceptional cases, have it repaired on site by a service partner appointed by SMA.

### Special Information on the Shipping of a Replacement Device

SMA will at its discretion send a replacement device that has an equal value in terms of product type, kVA power class or age to the warranty claimant or to a different delivery address communicated in advance by the warranty claimant. This replacement device will be sent either in advance or after prepayment of the value of the replacement device and the costs of delivery, or after receipt of the defective device. Provided the warranty claimant was trained by SMA to perform an assembly replacement independently, SMA reserves the right to send an assembly in place of a replacement device. As required by SMA, the warranty claimant must return the defective device or defective assembly at his own risk in a packaging that is suitable for its transportation to an address defined by SMA that will be located within the same country that the replacement device or the assembly is shipped from. The costs for transport or shipping of the replacement device or the assembly as well as the costs for return transport (export certifications, inspections, and customs duties) are to be borne by SMA.

SMA will also retain ownership of an assembly until it receives the defective assembly.

If SMA has decided to request from the warranty claimant the prepayment of the value of the replacement device or the assembly before delivery of the replacement device or the assembly, SMA will refund to the warranty claimant the amount received by the warrant claimant as prepayment of the value of the replacement device or the assembly once the warranty claimant has returned to SMA the defective device or the defective assembly, the defective device or defective assembly has been received by SMA and this defective device or defective assembly does not have any further defects not previously made known to SMA.

Should the warranty claimant return the defective device or the defective assembly more than thirty (30) calendar days after receipt of the replacement device or the assembly, then SMA has the right to charge the warranty claimant for the cost of administering the overdue Return Material Authorization (RMA) account. Return items will not be accepted without a valid RMA number obtained from SMA that is clearly displayed on the returned items packaging.

### **Specific Information if SMA chooses to Repair a Device at SMA's Premises**

If the device is to be repaired at SMA's premises, the warranty claimant must remove the defective device and send it for repair to the SMA repair center concerned at his own risk in a packaging that is suitable for the transportation. Once the device has been repaired, SMA will return the repaired device to the warranty claimant. The costs for returning the defective device as well as for returning it to the warranty claimant (transportation costs, export certifications, inspections, and customs duties) are borne by SMA.

### **Specific Information on the Coverage of Other Costs**

SMA will inform the warranty claimant of any costs (including, but not limited to transportation, replacement device value, export certifications, inspections, customs duties, travel, or accommodation) that require payment in advance of the repair action. The repair will be performed depending on the warranty claimant's consent to cover these costs.

- replace the defective device or defective assembly on site or have it replaced by a service partner appointed by SMA (when SMA reasonably concludes that the geographical area in which the system is operated is deemed too risky to render on-site services, SMA's obligations to render these services for said area are suspended for the period in which such risk is reasonably deemed to exist)
- and, in the event that an installer performs the exchange using the replacement device or, if applicable, the assembly, provided by SMA, will credit the installer with a service discount upon receipt of the defective device or assembly. The service discount is calculated per replaced inverter or per replaced assembly; this is a fixed amount that may be inquired from the SMA Service Line.

## Specific Information if SMA chooses to Repair a Device On-site

If SMA decides to repair the defective device or, if applicable, the defective assembly on site (replacement by SMA or a service partner appointed by SMA), the SMA Limited Factory Warranty includes the costs for materials and labor to repair the device as well as the costs for removal and replacement of the part or replacement device, provided however that the device is installed at ground level or a safely accessible level roof top, as well as the costs for transportation, export certifications, inspections, and customs duties for parts replaced or returned or for devices.
