

# Sunny Central Storage UP-XT

Extended grid-feed power

Battery inverter for large-scale storage systems

#### **Efficient**

- Up to 4 inverters can be transported in one standard shipping container
- · Higher power density
- Higher power in grid feed direction
- Higher short circuit contribution

#### **Robust**

- · Intelligent air cooling system OptiCool for efficient cooling
- Suitable for outdoor use in all climatic ambient conditions worldwide

#### **Flexible**

- One device for all applications
- Stand-alone device or turnkey solution with SMA mediumvoltage system
- Optional Silencer Kit reduces the noise emission by > 6 dB(A)

#### Versatile

- Integrated battery communication
- Customized monitoring and control of inverters
- Grid management functions for dynamic grid support
- Integrated voltage supply for internal consumption and external loads

With a max. output of up to 3067 kVA and system voltages up to 1500 V DC, the SMA Sunny Central Storage allows for more efficient and flexible system design for battery power plants.

The SCS UP-XT versions allow a system design with higher output power and higher short-circuit current contribution. The intelligent cooling system OptiCool ensure smooth operation even in extreme ambient temperature.

Use the SMA Silencer Kit to significantly reduce the noise emission of the device.

# **SUNNY CENTRAL STORAGE UP-XT**

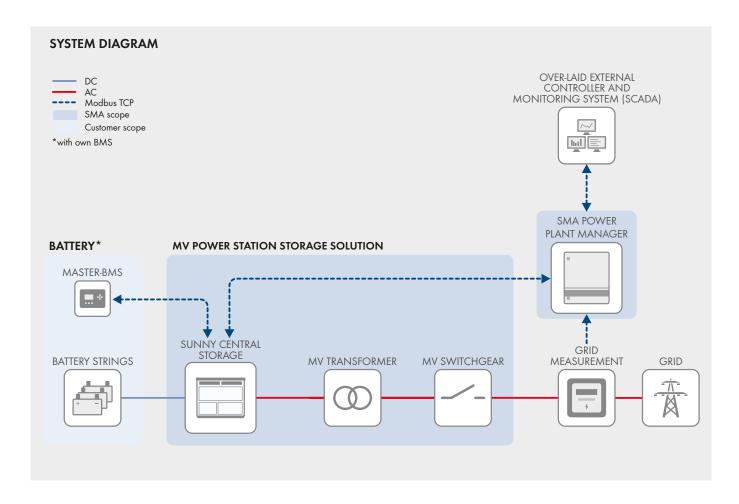

Technical Data	SCS 2300 UP-XT	SCS 2400 UP-XT	
Battery side (DC)			
Operating DC voltage range V <sub>DC</sub>	880 V to 1500 V	921 V to 1500 V	
Max. DC current I <sub>DC. max</sub>	3200 A		
Max. DC short-circuit current 12 15 15	over 5	over 500 kA	
Fused single busbar 22 connections per pole 161	•		
DC connection	with terr	minal lug	
Grid side (AC)		-	
Nominal AC discharge power at 1200 Vdc and cos φ = 1.0 (at 25°C)	2667 kW	2800 kW	
Grid-Feed mode: AC apparent power at 1200 Vdc, (at 25°C / at 40°C / at 50°C) <sup>3]13]14</sup>	2667 kVA / 2427 kVA / 2267 kVA	2800 kVA / 2548 kVA / 2380 k	
Charging mode: AC apparent power at 1200 Vdc, (at 25°C / at 40°C / at 50°C) <sup>3)13)14)</sup>	2393 kVA / 2179 kVA / 2001 kVA	2513 kVA / 2288 kVA / 2101 k	
Max. AC current I <sub>AC, max</sub> (at 25°C / at 40°C / at 50°C)		35 A / 2181 A	
Max, total harmonic distortion	,	minal power	
Nominal AC voltage / AC voltage range <sup>1] 8]</sup>	600 V / 480 V to 720 V	630 V / 504 V to 756 V	
AC power frequency / range	•	Hz to 53 Hz	
1 1 // 0	60 Hz / 57 Hz to 63 Hz		
Min. short-circuit ratio at the AC terminals <sup>9)</sup>	> 2

- Standard features Optional Not available
- 1) Below nominal AC voltage, AC power decreases in the same proportion
- 2) Efficiency measured without internal power supply
- 3) AC apparent power at higher dc voltages on request
  4) Self-consumption at rated operation
  5) Self-consumption at < 75% Pn at 25 °C

- Self-consumption averaged out from 5% to 100% Pn at 25°C
   Derating of 3% with Silencer Kit use by reducing the airflow; detailed information on the sound power is available under NDA.
- 8) Values apply only to inverters. Permissible values for SMA MV solutions from SMA can be found in the corresponding data sheets
- 9) A short-circuit ratio of < 2 requires a special approval from SMA

- 10) Max. power values (S/P/Q) can be requested based on project specific design
- 11) Earlier temperature-dependent de-rating and reduction of DC open-circuit voltage
- 12) The time constant τ = L/R (tau) of the DC circuit must be ≤ 1ms. Project configurations for DC short-circuit currents exceeding 500 kA require special approval from SMA.
- 13) The specified services can be provided on a long-term basis. Depending on the ambient temperature and the inverter temperature, the maximum temperature-dependent AC power can also occur on short notice
- 14) Depending on the ratio of reactive power (cos  $\phi$ ), an extended power derating may occur.
- 15) Please check the manual for further information
- 16) Fused DC input equipped with optional 900 A, 1000 A, 1100 A or 1250 A fuses

# **Grid-connected functions**

- Setpoints for active and reactive power
- Static grid support Q(U), P(f)
- Dynamic grid support (FRT)
- Active islanding detection (AID)
- · High compatibility with different battery types

# **Grid-forming features**

- Island grids / microgrids
- Synchronous grid forming grid-parallel operation

### Compatible with energy management system functionalities

- External static grid supporting functions
- Ramp-rate control of PV power
- Peak shaving
- Energy shifting
- Genset optimization control
- Reducing necessary spinning reserve of gensets
- Battery start-up and stop sequence
- Operates the battery within optimal operation window
- Black Start
